

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

Mortality statistics of 1,423 cities and towns of the United States for the year ended December 31, 1903.

The following table shows the mortality of each city, incorporated town, and village, the mortality rate being based upon the population according to the United States census of 1900, the Census Bureau's estimated population for 1903, and the local estimated population for 1903. It also gives the total mortality from certain contagious diseases.

This table has been compiled and prepared in the Bureau of Public Health and Marine-Hospital Service from replies received in response to the following circular letter, which was addressed to every city, incorporated town, and village in the United States having a population according to the United States census of 1900 of 1,000 or more.

The total number of letters thus addressed was 3,750; 1,716 replies were received, of which number only 1,423 could be utilized, 293 being incomplete.

Form 8958.]

[Circular letter.]

Information relative to mortality and morbidity statistics.

TREASURY DEPARTMENT,
BUREAU OF PUBLIC HEALTH AND MARINE-HOSPITAL SERVICE,
Washington, D. C., January, 1904.

To the Secretary of the Local Board of Health or Local Health Officer.

SIR: I have to request that you will furnish this Office, at your earliest convenience, with the following information relative to the mortality and (as far as possible) the morbidity statistics of the city, incorporated town, or village of..... during the year 1903:

Population, United States official census of 1900
 Estimated population.....
 Total number of deaths from all causes, including those from noncontagious diseases, accidents and violence (stillbirths excluded)
 Death rate per 1,000 of the estimated population

Disease.	Cases.	Deaths.	Disease.	Cases.	Deaths.
Tuberculosis	Measles
Smallpox	Scarlet fever
Varioloid	Diphtheria
Typhus fever	Membranous croup
Typhoid fever	Whooping cough

A penalty envelope, addressed to this Office, is inclosed for the return of this circular letter, and you are further requested to return the letter in case it is found impossible to make the desired entries in the above table, with a statement to that effect.

Respectfully,

WALTER WYMAN, *Surgeon-General.*

Name of city or town

Reported by

Mortality statistics of 1,423 cities and towns of the United States for the year ended December 31, 1903.

City or town.	Total deaths from all causes.	Population, United States census of 1900.	Annual mortality per 1,000 of the population, United States census of 1900.	Population Dec. 31, 1903, as estimated by the Bureau of the Census.	Annual mortality per 1,000 of the Census Bureau's estimated population for 1903.	Estimated population (local).	Annual mortality per 1,000 of the local estimated population.	Deaths from—
